

Easy and affordable rooftop mounting of your patio cover.

Benefits of the SkyLift Designer Riser™

The new SkyLift Designer Riser™ enables you to elevate a patio cover, pergola, or arbor above an existing house roof. It secures to a beam or 4x4 post to support your patio cover and allows you to match your home's roof pitch by adjusting the length of the support post. Invite natural light and airflow without re-framing the house. Erect a sophisticated pergola or arbor. The SkyLift Designer Riser™ opens up many new design possibilities.

- Simplifies roof tie-in & rain gutters
- Increases natural light and air flow
- Eliminates low slope providing more headroom
- Structurally sound, visually appealing

Cover Your Pergola is the premier provider of custom-sized, transparent pergola covers in Texas, Oklahoma and Miami. We pride ourselves on attractive solutions with the highest quality materials to ensure the ongoing satisfaction of our customers throughout the year, rain or shine.
